Steps to connect to the ESP8266 FTP Server
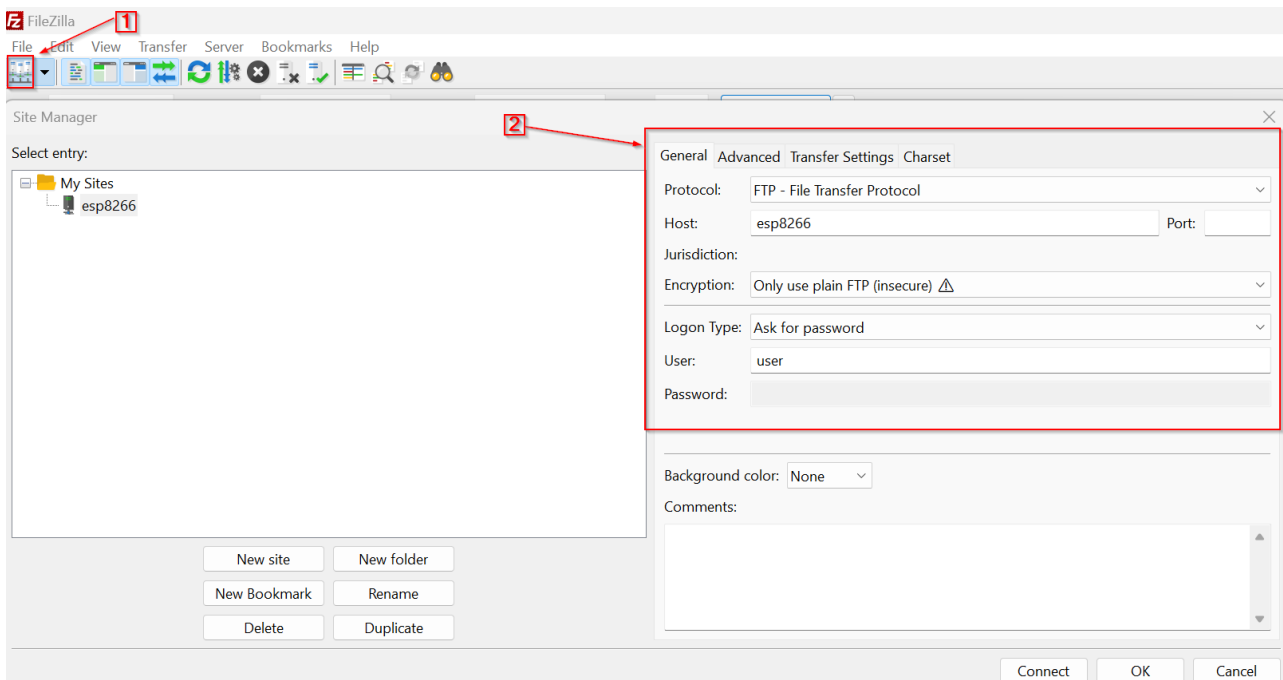

1) Download an FTP client. I'll use Filezilla for the configurations explained in this document.

The download is available at: https://filezilla-project.org/

2) Create a new session, with the following configurations:

In that screen, in the *Transfer Settings* tab:

3) Go to *Edit -> Settings -> FTP: File Types:*

    - Make sure to unckeck the option specified in "5":
